NINTENDO 3DS

TAKE A LOOK INSIDE

Introducing the Nintendo 3DS™ system. Experience game play featuring 3D graphics, with no need for special glasses. Nintendo 3DS is a breakthrough in portable entertainment, a truly cutting-edge technology unlike anything else in the market. It has to be seen to be believed.

Hardware Features:

- Play 3D games or capture, play with, and view 3D images, all glasses - free
- Adjust the level of 3D by using the 3D Depth Slider, or even turn it off completely to view in 2D
- Widescreen viewing with 800x240 resolution on the upper 3D Screen
- In addition to the familiar control pad features, a Circle Pad has been added providing 360 degrees of directional analog control.
- The built-in Motion Sensor and Gyro Sensor can react to the movement and tilt of the system which enables motion-compatible Nintendo 3DS games to respond instantly
- HOME button that allows you to pause gameplay at any time to return to the HOME Menu to use other applications
- New network and connectivity features including SpotPass™* and StreetPass™
- Plays almost all Nintendo DS™ games with their original 2D visuals. Nintendo DS games that require use of the Game Boy™ Advance slot are not compatible with Nintendo 3DS.

*Wireless broadband internet access required for online features. For more info, go to support.nintendo.com.

Built–in software including:

AR Games™ and the six AR Cards included, offers various games like turning your table into a playing field as you shoot targets.

Face Raiders™ makes everything around you part of the game as you are attacked by flying enemies—even with your own face!

Mii Maker™ lets you create your own customized Mii™ character on your system, wirelessly import Mii characters from your Wii™ system or use the cameras to take a picture of a person and have an automatic Mii character created. Users can save their Mii characters to an SD card as a digital image, which enables them to be used any way a digital photo would for personal use, such as a profile picture on social-networking sites.

StreetPass™ Mii Plaza™ is the place where Mii characters meet and greet! When StreetPass communication is activated, you can exchange Mii data, recent gameplay info, and more with other Nintendo 3DS owners you pass on the street. You'll then be able to see these Mii characters in the plaza the next time you start playing.

Nintendo 3DS Camera allows you to utilize the two outer cameras to take amazing 3D photos. You can even utilize a variety of lenses and tools to customize your photos.

Built-in parental controls allow for limiting internet and local wireless access, restricting games based on their rating, and deactivating the 3D effect of the upper 3D screen.

Fun games available now on Nintendo 3DS

Pilotwings Resort™
Take flight in 3D!
40+ challenging missions.

Steel Diver™
Explosive submarine combat in 3D!

nintendogs™ + cats
Toy Poodle, French Bulldog, and Golden Retriever
